

Mr. W. Milligan, after visiting with friends in Calgary, returned Saturday.

recently with Fred McGregor, chief enforcement officer for Canada on the Wartime Prices Board, I had a look at some of the counterfeit gas ration coupons seized when Black-Marketers of a ring were roped in. Pretty clever imitation they were, but eventually the law caught up with the racketeers. Enforcement in control legislation is a big job, taken on a nation-wide scale.

Want Normal Pep, Vim, Vitality?

Does weak, rundown, exhausted condition make you feel fagged out, old? Try Ostrex. Contains general tonics, stimulants, often needed after 30 or 40. Supplies iron, calcium, phosphorus, vitamins B₁. Helps you get normal pep, vim, vitality. Introductory size Ostrex Tonic Tablets only 30c. For

Prime Minister W. L. Mackenzie King (left to right in insets) who themselves stayed in the Citadel. Foreign Secretary Anthony Eden and Secretary of State Cordell Hull, the British and American experts on foreign policy, lived at the Chateau Frontenac.

Beau Jonathan

by J.B. Ryan

CHAPTER III

WHEN the coach was ready Jonathan ordered his own horse brought out and the reins fastened to the rear of the vehicle. "I am going with these people, Master Knowles. Therefore, if the gentleman I left upstairs inquires my identity, you will be telling no untruth if you state that I am a member of Mistress Jamieson's entourage."

"He shall not have your name from me, Jonathan," Knowles promised. "But you will have to drive fast if you expect to reach London ahead of him. The gentleman came here on horseback and it will not take him long to overtake you. Nevertheless, in spite of the warning, Jonathan took the road out of Winnet that led toward London. M. Denys, on the coachman's seat beside young Hale, was nervous.

"Better use that whip, M. Hale," he advised, peering over his shoulder at the town they were leaving behind. "That fellow will find clothes of some sort and will be after us like the devil himself."

"Jonathan smiled. "We need not worry about pursuers. At the first crossroad we are turning off this highway. Mistress Anne is no condition to travel. I am taking you to my home, where she will be safe and can rest while our friend, his lordship, is coming this road and the London streets."

"Bless!" Relief and appreciation of the simple strategy evoked a spontaneous laugh from the little Frenchman.

THE Hale farmhouse was in darkness when Jonathan drove into the yard. A shepherd dog barked welcome, and as Jonathan climbed down from the coach a shutter clattered and a voice inquired: "Is that you, Jonathan?"

"Yes, grandfather," he responded. "I have brought guests with me—one of them a lady suffering from shock and injury."

Once again Anne had to be carried. A light appeared in a window and Thomas Hale, a stooped old man, had the door open when Jonathan reached the house.

Grudgingly the old man shuffled aside to permit them entrance. In the kitchen was Faith, a stout, plain-faced girl, and at a word from Jonathan she lighted the way to her own bedroom with a candle. It was Faith who drew back the sheets and counterpane and covered Anne after Jonathan had lowered the girl's head to the pillow.

"I am sorry for the trouble I am causing," Anne smiled, and her eyes sought Jonathan. "This is your sister?"

"This is Faith Meade," said Jonathan. "An orphan whom my mother raised from a baby. Ex-Faith and I are to be married in a few days."

Anne's gaze returned to the blond girl, then her slim fingers stole out to rest on the square, rose-wooden hand smoothing the counterpane. "You are very fortunate, Mistress Faith. Jonathan will make you a good husband."

"Yes," Faith nodded matter-of-factly. "He can outwork any man here."

WHEN NERVOUS TROUBLES
MAKE ME NERVOUS
I FIND DR. MILLS' NERVE
HELPS TO RELIEVE NERVOUS
TENSION AND CALM
JITTERY FEELINGS

There's plenty these days to make people nervous. And overtaxed nerves can turn night into days into misery! If you suffer in this way, try the soothing, quieting effect of Dr. Mills' Nerve, which contains well-known nerve sedatives. Take Nerve according to directions for help in general nervousness, sleeplessness, hysterical conditions, nervous fears; also to help headache and irritability due to nervousness. In the meantime, eat more natural food, get your vitamins and take sufficient rest. Effortless Nerve Tablets are .35c and 75c. Nerve Liquid: 25c and \$1.00.

In Winnet and he goes to meeting every Sunday."

DENYS and Thomas Hale were standing near the bedroom door. The little man found the eyes of the old Puritan on him and shifted under the undisguised hostility. "We expect to reimburse you for your hospitality, monsieur," Denys apologized. "A night's rest should find Mistress Anne ready to return to London."

"Monsieur!" old Thomas repeated. "You are French?"

Denys nodded, and Hale's head jerked toward the bed. "That woman is my sister."

"No," said Monsieur Denys. "Your wife?"

"No. You see, the stage is our profession. Mistress Jamieson is one of the best-known actresses in London."

"Actress!" The word exploded from Thomas Hale, and he fell back as though in the presence of some-thing foul and unclean. "Great heaven! Jonathan—your bring this shameless creature—this hussy—under my roof?"

"Grandfather!" Jonathan caught the arm lifted like that of a wrathful Jove. "I offered these people sanctuary. Your sager upsets Mistress Anne! Surely we can suffer their presence for the few hours that remain of the night?"

Thomas Hale yielded. "I would not turn a mongrel dog from my door if the creature were ailing. These Frenches can spend the night, but get out of this room at once."

WHEN Jonathan retired to his room late that night after a long session with his grandfather, he found Monsieur Denys dancing about the bedroom and flourishing a rapier.

The Frenchman grinned sheepishly and lowered his sword. "I was lingering up my muscles," he explained his surprising exercises. "You see, when I get to London, I will be like the milord is I intend to call the fellow out."

It is unsatisfactory to practice alone, said Jonathan, imitating a scabbard sword hung by a belt over a wall-peg.

"You fence?" Denys inquired in surprise.

"Hardly," demurred Jonathan. "But all my life I have practiced at imagining you as you were just doing. You see—" he ran his hand carelessly along the bright blade of the rapier which had unsheathed "my father taught me to fence."

This sword has always fascinated me. Perhaps I can learn something from you, Monsieur Denys. I will help you to sharpen your eye."

He kicked off his shoes and touched his sword tip to the point that rose to meet it. The Frenchman's rapier slid down, expensively, found the proper and expected resistance, then vanished in a downward flick. Jonathan's hand dipped and gleamed in the candlelight, and the steel met again with a clash.

"Bravo!" Denys smiled, dancing about. "You know more of sword-play than you admit, Monsieur Hale. I see you can take care of yourself. Had you not blocked me when you did I would have pined you."

The two men warmed to their work, their feet moving and shifting as the blades licked in and out, foot-work being as much a part of swordsmanship as lunge and cut.

Somewhat of a natural "moulinet" he warned, with a shaky laugh. "These are not buttoned fashions! You are facing a living man instead of one of your usual stuffed sacks."

"Forgive me," Jonathan exclaimed. "I forgot myself. I—I forgot myself. Shall we put up our weapons?"

The nearness with which he had come to killing Monsieur Denys disturbed Jonathan and kept him awake long after the Frenchman, stretched on the sofa bed with him, was snoring peacefully. What had prompted

Jonathan, catching sight of that momentarily exposed throat, to drive in with murderous intent? Had it been jealousy?

WITH the morning Mistress Jamieson's injured ankle had recovered to such an extent that she was able to walk with no more than a trace of a limp.

Like Jonathan, her stay at the Knowles Tavern had been forced by the storm, and in the corner where trunks that it had been unnecessary to touch for an overnight stay. From this wardrobe the actress replaced the clothes she had been forced to abandon.

Jonathan followed the Frenchman and the two girls out when the coach was ready.

"You are certain it is safe to leave," he asked.

"Yes," Denys nodded. "Moreover, we intend to enter London from the direction least expected. The milord shall not molest us again."

The Frenchman climbed into the driver's seat and gathered up the reins. Estelle was already in the coach. "Good-by, Jonathan," Anne extended a hand. "I hope you find something to your liking." As her fingers fell into his great palm she stepped closer on tip-toe and, before he had divided her intention she kissed him squarely on the mouth.

"Thank you, Jonathan," she murmured, her lips moving against his, for all you have done for me. Please remember me as the lady you thought me in the beginning."

She attempted to free her hand, then paused, startled at the expression on his face. Before she could step back Jonathan swept her into his arms, crushing her close to him, his lips seeking hers once more.

"Jonathan! Jonathan!" she pleaded, struggling in his grasp. "Please—let me go!"

Slowly he released her and remained standing there, watching Anne enter the coach and the vehicle drove off.

"Jonathan," said another voice, and Faith Meade was beside him, peering anxiously into his face. "Jonathan!" Her hand brushed his arm timidly. "You are trembling, Jonathan—"

(To Be Continued)
Jonathan has an argument with his grandfather.

Canadian Labels

War Supplies For United Nations To Carry Distinctive Symbol
Canadian-made war supplies to the United Nations are going to carry the name "Canada" in three languages, Chinese, Russian and English in the future, the mutual aid board announced.

The new insignia for Canadian war exports is in the form of a circular sticker centred on a maple leaf and designed in red, blue and gold. The name "Canada" in three languages edges the circle. Distribution of the stickers is being handled by the Canadian Manufacturers' Association.

Under the mutual aid plan, made-in-Canada products will be available in China, Russia, the United Kingdom, Australia, New Zealand, India, the French Committee of National Liberation, the Caribbean area and possibly to other United Nations.

The new label is intended to convey to Allies the story of Canada's sympathetic co-operation and develop new kinship that will outlast the war, the board said in its announcement.

HAVE TO BE COLORED

Ripeness of an orange is not determined by its color. Naval oranges do not color up when ripe and have to be colored orange because of public prejudice against buying green oranges.

The coconut palm is the chief wealth of the Solomon Islands.

Pies Without Pastry

Graham Wafers Overcome The Shortening Shortage

(By Molly O'Dale)
There's no reason in the world why your family should not enjoy delicious pies for dessert, despite the scarcity of rationed butter and other shortenings. Here's a pie crust that requires no shortening of any kind—a tender, delicious pie crust that comes ready-made straight out of a cardboard package—no flour, no rolling, no fuss whatever.

First, get a package of Christie's Graham Wafers. Then, place a layer of wafers on the bottom of a lightly-greased pie-plate, trimming some of them to fit the shape, and filling in any uncovered spaces with water crumbs. Cut other wafers in halves and stand them on edge around the sloping side of the pie-plate. And there's your pie-crust!

Don't be skeptical as to whether the pie crust will hang together when individual pieces are cut after the filling goes in. It will! Just try it and see for yourself. You'll find that each individual wedge of pie comes out intact. For the filling of Christie's Graham Wafer Pie, use one of the following recipes:

Chocolate Filling
3 tablespoons corn starch
2 cups milk
5 tablespoons sugar
1 square chocolate or 4 tablespoons cocoa

Vanilla Filling
1/2 teaspoon vanilla
Mix dry ingredients with a little cold milk. Scald rest of milk and add corn starch mixture. Put in double boiler and stir while it cooks and thickens. When smooth and somewhat thick, cover and cook for 10 minutes more, stirring occasionally. Remove from fire and add vanilla. Pour into graham wafer crust and chill.

Caramel Filling
3 tablespoons corn starch
2 cups milk
5 tablespoons sugar
1 teaspoon butter
Pinch of salt
1/2 teaspoon vanilla or a few drops of maple

Caramelize sugar by heating over direct fire in top part of double boiler until it becomes a golden brown syrup. Remove from fire and add 1 1/2 cups of milk. Place over lower part of double boiler. Mix corn starch and salt with remaining cold milk to make a smooth paste. Pour hot milk into paste and stir thoroughly. Pour back into double boiler and heat until it begins to thicken, stirring constantly. After it thickens smoothly, cover and cook for 10 minutes. Stir occasionally. Remove from fire and add butter and vanilla. Pour into crust and chill. Chopped nuts or dates may be added, if available.

Apple Chiffon Filling
1 tablespoon plain gelatin
1/4 cup cold water
2 cups sweetened hot applesauce
1/2 teaspoon nutmeg
1 tablespoon lemon juice
Pinch of salt and 2 egg whites

Soak gelatin in water 5 minutes. Then add to hot applesauce and stir until dissolved. Stir in nutmeg, lemon juice and salt and chill until mixture begins to thicken. Fold in stiffly beaten egg whites. Pour filling into crust, sprinkle with graham wafer crumbs and chill.

IRON LUNG FROM SCRAP
How naval artificers at Gibraltar made an "iron lung" out of scrap and saved a man's life was described by Sir Sheldon F. Dudley, medical director-general of the British navy. The man was attacked by infantile paralysis at a time when the only lung on the Rock was in use, he said.

Naval artificers used scrap metal to copy the lung and it worked perfectly.

Interred motorcyclists a few years ago; now among Canada's most travelled soldiers.

And it isn't such a long step from one to the other! Ask the three instructors of the newly-formed Canadian Motorcycle Maintenance School—a mobile house of knowledge which is touring camps from one end of Canada to the other.

Hundreds of Army officers, N.C.O.'s and men will learn maintenance and repair short-cuts from these professors of motorcycle mechanics before the end of the year.

This new role for instructors Lieut. C. G. E. Downing, of Swift Current, Sask.; Sgt. Gordon Davies, of Toronto; and Sgt. J. N. Rae, of Calgary, is the culmination of years of tinkering with temperamental pre-war "bikes" and practical experience with the Army's sleek, new mounts.

All three owned "bikes" before the war and were well-grounded in motorcycle mechanics before they enlisted. Sgt. Davies, a veteran

of the war, was one of the first to be sent to the front.

The school will stop one week with each unit. In that time, the entire field of motorcycle mechanics will be surveyed and students given an opportunity to match wits in a mechanical way with experts.

Equipment carried by the vans includes a complete motorcycle, two cut-away models of motorcycle engines, a "bite" transmission and a model lighting system. A blackboard and a number of charts are utilized for lectures.

Drivers of the unit's station wagons are Pte. J. D. Hisey, of Edmonton, and Pte. Ernie Clements, of Montreal.

With three quarters of a ton of equipment aboard, two station wagon station wagons headed out of Kingston, Ont., early in July. The mobile Canadian Motorcycle Maintenance School was officially born; and one of the longest tours in Canadian military history started.

Present schedule of the unit calls for a jaunt to the Atlantic seaboard and then a swing back to western military districts. Practically every unit in Canada will be visited by the mobile school before the end of the tour.

Teaches Motorcycle Mechanics To Troops

Practical lessons in motorcycle mechanics will be given hundreds of Canadian Army officers and men by instructors of the new mobile motorcycle maintenance school, now touring camps across the country. In this view Sgt. J. N. Rae, of Calgary, an instructor, checks the work of Pte. J. D. Hisey, of Edmonton (centre) and Pte. Ernie Clements, of Montreal.

When Capt. P. D. Iverson brought his airliner to a stop in Regina airport, August 31, after a successful flight from Saskatoon, it marked attainment by the prairie division of Canadian Pacific Air Lines of 100 per cent. efficiency for the month of August. The division had flown 21,636 miles, or roughly the equivalent of one and a quarter times around the world. Not one scheduled flight had been lost. Six hundred and ninety-one passengers had been carried; 6,629 pounds of mail delivered. This, in air-line parlance, amounted to 90,142 pound-miles of mail. No flights were cancelled because of weather, though August brought a number of thunderstorms along the route between Regina, Moose Jaw, Saskatoon and North Battleford, and Prince Albert. Shown above are, left to right: Capt. Iverson, First Officer H. E. Thorn, W. T. Bunn, flying assistant superintendent, and H. T. Bancroft, supervisor.

 WAR SAVINGS
 STAMPS

Edmonton, September 16th.

Stook Sweeps: One hundred and fifty long
 wooden boxes, each containing
 over three hundred pounds of rods and metal were
 shipped last week from the Standard Iron Works,
 Edmonton, to points in Alberta, Saskatchewan, Man-
 itoba and British Columbia.

Labelled "Stook Sweep Kit No. 2", they are
 on their way to the harvest fields of Western Canada
 where they will help relieve the man power shortage.
 The Stook Sweep was developed by the Department
 of Agriculture and the Provincial Marketing Board
 and is said to do away with at least four bundle teams.

Kit No. 2 is an all-metal sweep fitting on the
 front of a tractor. Driven down the row of stooks,
 the bundles are picked up, transported to the thresh-
 ing machine and dropped, while the tractor spies
 away for another load.

As you know the labour problem is really
 acute; few threshing rigs can muster a full crew. But
 with increasing numbers the problem is less alarming
 ... because of Stook Sweeps.

Harvesting operations are in full swing under
 very favorable weather conditions. Farmers are
 overcoming some of the labour shortage difficulties in
 areas of good crops by the use of labour saving
 devices.

Frost damage has been most serious in Crop
 Districts 6, 7, 8 and 9, reducing grades of Cereal
 crops and considerable anxiety is felt over the seed
 grain situation. It is expected that seed from outside
 sources may have to be shipped to some points most
 seriously effected. Although frost was less severe in
 Crop District 2, considerable damage has been done
 to tender gardens and canning crops.

Please Contribute to Christmas Parcels

The Chinook branch of the
 Red Cross are soliciting sub-
 scriptions on behalf of Christ-
 mas parcels for Local Boy
 Overseas. These lists have
 been placed in all stores and
 at the Garage. Please con-
 tribute early so that the
 parcels can be packed and
 mailed in good time. See that
 each local boy is remembered
 for Christmas.

The Ladies' Card Club Met Thursday Evening

SEEDTIME AND HARVEST

By
 Dr. R. W. Neely
 Director, Agricultural Department
 North-West New Elevators Association
 These Varieties, Yesterday, Today
 and Tomorrow

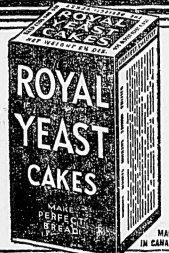

Red Fife should be remembered
 with respect, since it was largely
 responsible for establishing our
 reputation for high quality wheat.
 It shattered badly and was a late
 that fall frost was an annual peril.
 Its doom was sealed by the stem
 rust epidemic of 1916 when it was
 already on the way out.

Marquis did not shatter, was early
 enough to escape many frosts which
 would have ruined Red Fife, and it
 certainly suffered less from stem
 rust. Plant breeding had made great
 strides; but stem rust was still causing
 enormous losses. Earlier varieties
 notably Ruby, Harvard and Gam-
 were distributed and served a useful
 purpose in some areas. Kola and
 Ceres had a measure of resistance to
 stem rust, but it remained for
 Thatcher to do to Marquis what it
 latter had done to Red Fife.

Now, in Manitoba, Regent and
 Arctura are displacing Thatcher by
 virtue of their resistance to leaf rust.
 These improvements have been
 achieved by a small body of under-
 agricultural scientists at a cost
 of, probably, much less than one
 four-engineered lumber per year!

The most important hurdles now
 confronting the wheat breeder are
 wheat stem sawfly and drought.
 I have no hesitation in asserting that
 these two problems are more diffi-
 cult than were late ripening and
 stem rust. Indeed, the drought
 hazard can never be removed,
 though it will be reduced. Enormous
 quantities of breeding material must
 be handled and many different
 crosses investigated. If wheat grow-
 ers are wise, they will see that this
 item is prominent in post-war govern-
 ment budgets.
